

Weave BI Insights Reorder & Replenishment (R&R) Dashboards

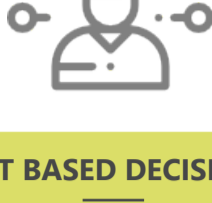

Learn how Weave can help optimise factory reorder and store replenishment decisions

Visit www.weavenow.com

DID YOU KNOW?

Dead inventory is costing US retailers over \$50 billion a year

IS YOUR ORGANISATION FACING THESE CHALLENGES?

GUT BASED DECISIONS

Difficulty getting timely data to support replenishment decisions

MANUAL DATA PREPARATION

Excel and other time consuming manual tools are delaying new insights

STATIC REPORTING

Current reports lack the depth to drive decision making

OUR DASHBOARDS CAN HELP

Our dashboards base replenishment quantities on statistically proven methods

Our software blends multiple data sources and calculates KPIs in < 1 day

Our tailored visualisations are designed to promote decision making

KEY BENEFITS OF WEAWE DASHBOARDS

DECISION-DRIVEN DESIGN

Data visualised in a way to drive decision making

ADVANCED PLANNING LOGIC

Machine learning techniques combined with industry expertise for optimised insight

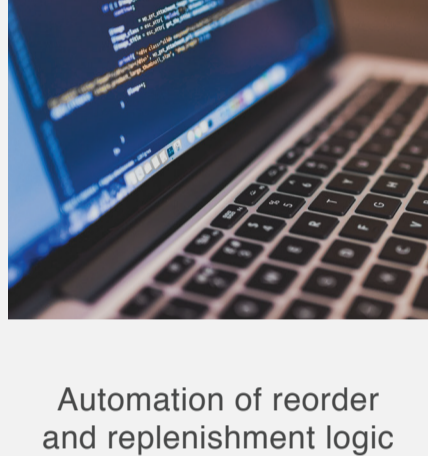

AGILE IMPLEMENTATION

A 2 week sprint from initial contact to insight tailored to your business

REORDER & REPLENISHMENT (R&R) DASHBOARDS

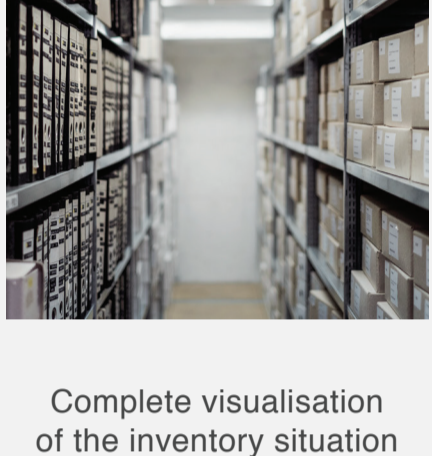

The Factory Reorder & Store Replenishment Dashboards eliminate the time spent on repetitive tasks to free your planners' time to focus on the business situation.

Automation of reorder and replenishment logic

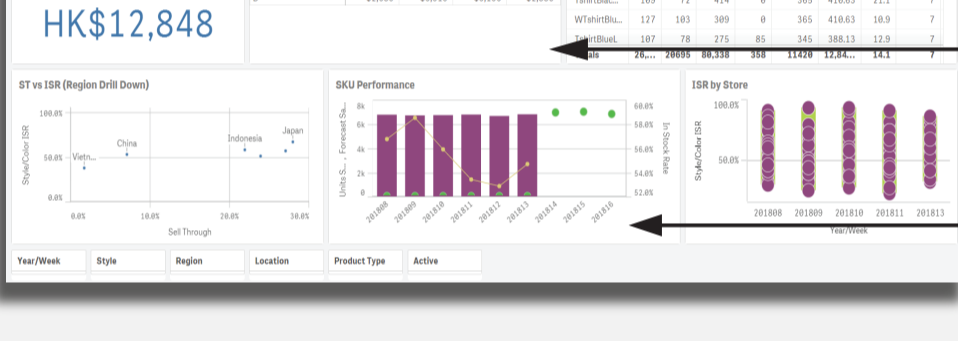

Product classification by sales performance to make informed reorder and replenishment decisions

Complete visualisation of the inventory situation

THE FACTORY REORDER DASHBOARD

Balances forecasts and budgets against lead times and MOQs

Grades sales performance to make informed reorder decisions

Detailed sales and inventory analysis to determine reorder priorities

THE STORE REPLENISHMENT DASHBOARD

Analyses and prioritises DC inventory to replenish

Identifies areas of low inventory cover

Show impact of dead stock and sales loss

DASHBOARD ACTIVATION PROCESS

Contract Agreement & Payment

Weave consultant reaches out within 24 hours for clarifications & provides standard contract. Client signs agreement and initiates setup fee payment. Weave consultant confirms payment receipt.

Infrastructure Setup

Weave IT team sets up access folder in AWS and sends activation email within 3 days. Client logs in and adjusts security settings and rights (if desired).

Data Upload & Preparation

Weave shares data requirements for dashboards. Client makes raw data available for Weave to access (via clients template or customized uploads in Weave template). Weave consultants review 1st data upload, recommends refinement if required. Weave cleanses and blends raw data for dashboard generation.

Dashboard Generation & Refresh

Weave consultant refreshes dashboards weekly generated dashboards uploaded to report folder every Monday 12 noon.

Dashboard Review & Action

Client reviews dashboards for key actions. Weave consultant provides monthly 1-hour tele-coaching sessions for effective use of dashboards.
